WHERE IT GOES  
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make two. Cut 155 x 50 from 10 mm fabric-ply rubber sheet.  
Drill two 6.5 holes on the centre line, 35 from each end, and counterbore them 13 diameter, 4 deep from the trunk side, so the screw heads sit 3 below the rubber face.  
Bond to the bar's trunk-side face with contact adhesive, the inner end 15 from where the two pad faces would meet.  
Fit M6 x 30 countersunk stainless screws through the pad into the rivet nuts in the bar face, with threadlocker.  
Replace a pad that is torn, glazed or soaked in oil.
