WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make four. 4 mm 6082-T6 aluminium, 50 outside, 22 bore.
Cut from plate offcuts; do not use steel washers.
One ring each side of each eye, the bores in line with the
22 eye hole within 0.5 mm (use a 22 pin to line them up).
TIG weld all round the outside, 3 mm fillet, ER5356 filler;
no weld in the bore. Keep 4 mm (eye 13 thick, as sized).
After welding, round the bore edges to 2 mm radius, so a
carabiner bears on a smooth curve, never a sharp edge.
Finished eye: 13 thick (4 + 5 + 4).
