WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut a cross from 3 mm sheet: a bridge 56 long (front to back) x 27 wide, with a leg 6 wide and 73 long at the middle of each long side.

Bend both legs down 90 deg so they sit 21 apart inside: they slide over the two 8 mm cheeks between the notches.

Drill 8.5 through both legs, 69 below the bridge's top face.

The bridge lies on the cleat top across both slot mouths, so a chain link cannot lift out of its slot.

Tie the lock pin's lanyard to one leg.
