WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Buy 110 links of 6 mm grade 80 chain (about 1.98 m) with its certificate, cut to length by the supplier. Count the links.
Never weld, heat, grind or bend the chain.
One end (the adjustable end): fit the master link with a 6 mm grade 80 connecting link and peen its pin.
Other end (the fixed end): it goes into the front slot; a second connecting link ties its 6th link through the tether hole.
Paint the 56th, 72nd and 100th links from the fixed end: the link that drops into the rear slot on 200, 300 and 450 trunks.
Drawn: eight links, the connecting link and the master link.
