WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make four. 4 mm steel, 50 outside diameter, 22 bore.

Cut from plate or buy as heavy washers and open the bore.

One ring each side of each eye, the bores in line with the 22 eye hole within 0.5 mm (use a 22 pin to line them up).

Weld all round the outside, 3 mm fillet; no weld in the bore.

After welding, round the bore edges to 2 mm radius, so a carabiner bears on a smooth curve, never a sharp edge.

Finished eye: 13 thick (4 + 5 + 4).
